Chinook, Alberta

School Fair Is Success

The Chinook and District School Fair was held in the Agricultural hall on Saturday, Sept. 16. The day was fine, but the roads were bad owing to the rain the previous day, which delayed operations in judging, etc. Although no government grant has been given this year in connection with school fairs, the officers decided to carry on, depending on local interest and support for its success. There was a large attendance of both adults and pupils on hand for the parade, sports, exhibits, etc.

At 1 p.m. all gathered in the school hall where the singing and physical training classes were judged, with the following results given:

Singing
1 Mr. Nordin's room, Chinook
2 Miss F. Robinson's room,
3 New Bliss, Miss Clara Anderson, teacher.

Physical Training
1 Swan school, Miss I. Tobin,
2 Chinook Con's. school.

The parade then took place and created a great deal of interest among the large number of spectators on hand.

Swan school, with Miss Tobin teacher, won first prize in the parade with Chinook Con's, being awarded second place.

Fair Prize Winners

The following is a list of those who won prizes with their exhibits in the different classes, and their reward.

Garden Products

Class 1 - Carrots
1 Gordon Marr, 2 Grace Stewart, 3 Frank Marcy, 4 Florence Marr, 5 Myrtle O'Malley, 6 Robert Harrington, 7 Jim Marcy, 8 Hazel Harrington, 9 Ruth Harrington.

Class 2 - Beets
1 Myrtle O'Malley, 2 R. Marcy, 3 F. Marcy, 4 A. Thompson, 5 G. Coutts, 6 G. Marcy, 7 Bruce Hutchison, 8 G. Marr, 9 Robert Proudfoot.

Class 4 - Turnips
1 Myrtle O'Malley, 2 B. Hutchison, 3 Mervin Laughlin, 4 Ruth Harrington, 5 R. Harrington, 6 Margaret Little, 7 Hazel Harrington, 8 F. Marcy, 9 Bob Marcy.

Class 6 - Shelled Peas
1 Avis Lettwith, 2 Gabrielle Massey, 3 Calvin Laughlin, 4 D. Ray, 5 Hazel Harrington, 6 E. Ray, 7 Ruth Harrington, 8 Christie Coutts, 9 Grace Stewart.

Class 7 - Cabbage
1 F. Marcy, 2 J. Marcy, 3 R. Harrington, 4 Ruth Harrington, 5 C. Laughlin, 6 Hazel Harrington, 7 G. Marcy, 8 R. Marcy, 9 D. Anderson.

Class 8 - Potatoes white:
1 F. Marcy, 2 Alice Peterson, 3 G. Marcy, 4 R. Marcy, 5 J. Schmidt, 6 Kathleen Proudfoot, 7 Robert Harrington, 8 J. Marcy, 9 Wilfred Britton.

Class 9 - Potatoes, red
1 G. Rosenau, 2 F. Marcy, 4 A. Lettwith, 5 J. Marcy, 6 R. Harrington, 7 Ruth Harrington, 8 B. Hutchison, 9 G. Schmidt.

Class 12 - Sweet Peas:
1 Grace Stewart, 2, 3, 4, F. J. B. Marcy, 5 Margaret Little, 6 A. Thompson, 7 G. Marcy, 8, 9, R. and Hazel Harrington.

Chinook Consolidated School Meeting

The Board of the Chinook Con's. school held a regular meeting in the school on Saturday evening, Sept. 9. Members present were, Messrs. Otto, Rosenau, and McDonald.

The minutes of the last meeting were read and adopted. After which followed the reading of bills presented for payment, of applications for van-driving, and of other correspondence.

Motions passed and carried were as follows:

Payment of the following bills be approved:

Empire Lbr. Co.	\$23.70
Imperial Lbr. Yards	40.10
C. W. Rideout	15.00
M. L. Chapman	2.20
C. E. Barry	4.00
Acadia Produce	1.45
Robinson Bros.	12.40

Repairs required for kitchen stove be ordered from Green's Greater Stove and Repair Co., Winnipeg.

Pupils from Dobson S. D. be admitted to the school for 20c per day per pupil, and hat as long as there is room in the van they be permitted to ride in van on Route 3 for 5c per day for all.

Grade 3 be transferred from room 1 to room 2.

That following additional arrangements be made with regard to van-driving:

Route 3 - F. Dumanowski from October 1 until further notice.

Route 4 - J. Rosenau, from Nov. 1 until Nov. 30.

Adjournment of the meeting was then called.

Class 11 - Snap Dragons:
2, 3, Hazel and R. Harrington, 4 Grace Stewart, 5 Ruth Harrington, 6 Florence Marr.

Class 25 - Corn:
1 Gabrielle Massey, 2 A. Lettwith, 3, 4, 5, Ruth, Hazel, and R. Harrington, 6 M. Laughlin, 7 F. Marcy, 8 Myrtle O'Malley.

Class 26 - Weeds:
1 F. Marcy.

Class 27 - Weed seeds.
1, 2, 3, F., R., and G. Marcy.

Poultry
Class 35 - Pen of Chickens:
1 Peggy Lawrence, 2 Harold Rosenau, 3 D. Roy, 4 F. Marcy, 5 M. Laughlin, 6 R. Marcy, 7 Helen Rosenau, 8 Myrtle O'Malley, 9 J. Marcy.

Class 36 - Pen of Chickens:
1 Walter Rosenau, 2 Myrtle O'Malley.

Class 37 - Cockerel, American
1 Elaine Roy, 2 Willie Marten, 3 Gordon Wilson, 4 Irma Funk, 5 Myrtle O'Malley, 6 Earl Robinson, 7 Wilbur Myhre.

Class 38 - Pullet, American or English.
1 W. Marten, 2 G. Wilson, 3 Peggy Lawrence, 4 J. Wilson, 5 Myrtle O'Malley, 6 Irma Funk.

Class 39 - Cockerel, Mediterranean.
1 Myrtle O'Malley.

Class 40 - Pullet, Menit'er'an.
Myrtle O'Malley.

Class 41 - Turkey Gobbler:
1 Henry Funk, 2 Frank Marcy, 3 Helena Rosenau, 4 Myrtle O'Malley.

Rearville News

The Langford and Rearville districts were well represented at the School Fair.

Mr. and Mrs. Strand, Gladys and the Carlson brothers were guests at the Osterberg home on Sunday.

Archie Mason arrived home from the North country on Friday, and will visit for a short time with friends and relatives.

Mr. and Mrs. G. A. Mason left the district to return to their old home in Indiana.

Mr. and Mrs. W. Holder were supper guests at the Walzak home on Saturday.

J. E. Bunney made a trip to Duchess on Saturday to bring back his daughter Gwenn, who has been visiting there for the past two months.

L. Kure has taken up residence on the Geo. Nicholson farm.

Peyton News

Several from this district went to the river on Thursday to pick berries.

Mrs. Annie Anderson and Miss E. Warren visited with Mrs. Kjimhus on Wednesday.

Mr. and Mrs. A. Bjornrud were dinner guests at the Wilton home on Sunday.

In spite of the rain last Friday the pupils of Peyton school were busy getting their school fair exhibits ready, what proved to be a worth while task for them, as many of them came home with first prizes.

The dance at Peyton school on Saturday was not as well attended this time, on account of the fair. However, there will be another dance at the school Sept. 30th, Everybody is welcome.

The Railways kindly giving free freight on Potatoes and Vegetables.

The International Wheat Agreement

In this column last week reference was made to the speech delivered by Premier Bennett on his return to Canada from the World Economic Conference and International Conference of wheat exporting and importing nations. Important facts, figures and general information affecting the world wheat situation were presented, all of which had a bearing upon and led up to the entering into of an agreement by twenty-one nations vitally interested either as exporters or importers of wheat designed to advance the common interests of all.

Inasmuch as there is no one question of more vital importance to the people of Canada, and more particularly of Western Canada, than wheat, we propose to supplement last week's article by a further reference to the subject. Statistics compiled covering a long period of years go to establish the fact that when the wheat producers of the world are prosperous—that is, when the price of wheat is high enough to return a fair profit to the farmers raising it—industry generally throughout the world is likewise prosperous. In other words, wheat is shown to be the barometer of prosperity. Naturally so, because it is the standard food of the great bulk of the human race.

First, we restate the terms of the new international wheat agreement:

The chief wheat exporting nations, that is Canada, Australia, Argentina and the United States, agree to limit their combined exports of wheat in the crop year August 1, 1933, to July 31, 1934 so that the total world exports of all countries shall not exceed 560,000,000 bushels. Of this amount Canada's export allotment is 200,000,000 bushels.

These four countries further agree that during the following crop year August 1, 1934, to July 31, 1935, they will limit their exports of wheat to maximum figures 15 per cent. less than the average yield and average acreage sown during the period 1931-1933 inclusive.

The minor wheat exporting countries, that is Bulgaria, Hungary, Roumania and Yugoslavia agree to limit their combined wheat exports in both the crop years 1933-34 and 1934-35 to 50,000,000 bushels.

While Russia entered into no definite agreement as to restrictions on either production or exports it did agree to enter into further negotiations governing exports.

On the other hand, the importing countries:

(1) Agreed not to encourage any increase in the area sown to wheat in their respective countries.

(2) Agreed not to take any governmental measures the effect of which would be to increase the domestic production of wheat.

(3) Agreed to adopt every possible measure to increase the consumption of wheat.

(4) Agreed to the removal of measures which tend to lower the quality of breadstuffs, and thereby decrease the human consumption of wheat.

(5) Agreed to lower their customs tariffs on wheat when the world price reaches and maintains for a specified period an average fixed price.

Finally, an international Wheat Advisory Committee was set up, representative of both exporting and importing countries, to watch over the working and application of this agreement.

Such is the new international agreement governing future wheat production and export. It is one concrete outcome of the World Economic Conference. Whether it will be successful in operation and satisfactory in its results time alone will disclose.

It involves the question of less wheat on the part of Canada than was hitherto the case in normal years. Consequently, it involves the raising of less wheat, and the putting of a stop to further increases in wheat acreage and production. For the crop year 1934-35 this reduction is set at 15 per cent. below the average for 1931-33.

Admittedly, the Dominion Government can restrict exports to any figure it may like. That is entirely within its control. But how can that Government limit production? In the United States it is being attempted by paying a bonus to farmers to reduce their wheat acreage, the said bonus to be paid out of a fund created by imposing a special tax on wheat production in the United States. In other words, compensation is being offered the U.S. farmer. It is reported from Ottawa that this idea does not meet with favor nor find much support there.

It is further reported from Ottawa that the Federal Government does not intend to apply any compulsion to bring about a 15 per cent. reduction in wheat acreage, but will rely on an educational campaign among farmers designed to encourage them to voluntarily reduce their wheat acreage. Will the farmers respond to such a campaign? And if certain farmers are willing, and certain farmers are not, what will the result be? If one farmer reduces 15 per cent. and another increases 15 per cent. the country will be in exactly the same position. If a set of farmers decline to reduce 15 per cent. even if they do not increase their production, it means that another set of farmers would have to reduce 30 per cent. in order to bring about an average 15 per cent. reduction.

Then, it is to be noted, that the 15 per cent. reduction in 1934-35 is to be from the average yield and acreage sown in 1931-33 inclusive. But tens of thousands of Western farmers and millions of acres of land produced little or nothing in these years. They must be allowed to produce as largely as possible in 1933-34 and 1934-35 in order to recoup their heavy losses in these disastrous years. If they are to do so, and at the same time the total production is to be reduced by 15 per cent., it seems inevitable that those farmers who had fair crops in the period 1931-33 must decrease their future reduction by very much more than 15 per cent.

And what, it will be asked, is to be done with the acreage taken out of wheat production? Can our farmers afford to work it and allow it to lie fallow? They cannot afford to let it run to weeds. Will the result not be to devote it to other grains with the inevitable result of large surpluses of such grains over and above domestic and export demands?

Without attempting to speculate on the effect which weather conditions will inevitably have on the success or failure of the proposed plan of restriction, and which of course are beyond all human control—one further question arises: If production is not decreased while at the same time exports from Canada are restricted, and as a consequence surpluses pile up on the farms or huge carry-overs are built up in the elevators, what will the effect of such surpluses have upon the world prices? It is admitted that our present large carry-overs have depressed and continue to depress prices. What hope is there of a rise in international prices, and a consequent lowering of tariffs by importing countries, if available wheat supplies are not limited to demand?

Then, too, there is the question as to the effect this new international agreement—with its provision for reductions of customs duties by importing nations when the price rises—upon the existing agreement between Great Britain and Canada, whereby Britain imposes a duty on foreign-grown wheat while admitting our wheat free. The effect of this is to depress the price of foreign wheat, yet the price of foreign wheat must rise in world markets before the provision of the new international agreement becomes operative under which the importing nations undertake to reduce their customs tariffs against wheat, that of Canada included.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Carnivorous Plants

Trap Insects With Lightning-Like Rapidity In Snapping Maws

New light was cast on mysterious workings of the snapping maws of carnivorous plants. Prof. F. E. Lloyd, president for 1932-33 of the Royal Society of Canada, in his presidential address to the botanical section of the British Association for the Advancement of Science, recounted his observations of some 75 species of the bladderwort—a type of plant that snatches its food from air or water.

The professor of botany at McGill University, Montreal, contributed a highly technical paper which he labelled a continuation of his review of carnivorous plants.

The address set out the details of the structure of the "door" which the flesh-eating aquatic or terrestrial plant slams shut on such unfortunate mail insects as may come wandering within reach. Super-speed-motion pictures, Prof. Lloyd related, had disclosed the hungry bladderwort opened the fatal door in 1-100 second, and closed it in 1-40 second, completing the whole operation inside 1-16 second. Included in the 75 types in Prof. Lloyd's summary was the purple bladderwort found growing in the vicinity of Montreal.

Old Newspaper Changes Hands

Seldirk Record Was Founded 48 Years Ago

The Seldirk Record, weekly publication founded 48 years ago by the late James Stewart and carried on by his son, Robert, has been sold by his daughter, Mrs. Margaret I. Colclough, to Charles A. Crowder, who has been a member of the Record staff for the past ten years, and W. H. G. Taylor. The management of the paper has been in the hands of Mrs. Colclough for six years, owing to her father's illness, part of the time, and his active engagement with another newspaper enterprise in the eastern part of the province. The new owners announce a policy of independence in politics.

Should Have Foreseen Slump

Expert Thinks Managers Of Banks Were "Extremely Blind"

Managers of central banks throughout the world were "extremely blind," in not foreseeing the approaching depression some years ago, the royal commission on banking was told at Toronto. It did not follow that it was impossible to secure a Canadian of sufficient ability and vision to head such an institution in Canada.

This viewpoint was expressed by A. J. Glazebrook, special lecturer in banking at the University of Toronto, in answer to questions by Mr. Thomas White, a member of the commission.

Saskatchewan Lumber Cut

Report For Last Year Gives Amount As 28,813,140 Feet

Although the amount of lumber cut in Saskatchewan during 1932 was considerably less than for the previous year, the majority of mills managed to operate at least part time, according to a bulletin of the department of railways, labor and industry. The total number of saw mills in operation in 1932 numbered 103. Twenty-four mills including some of the larger mills did not operate. The total amount of lumber cut by the operating mills was 28,813,140 feet board measure.

Willing To Help

For months he had been very devoted admirer. Now, at long last, he had screwed up sufficient courage to ask her the most momentous of all questions.

"There are quite a lot of advantages in being a bachelor," he began, "but there comes a time when one longs for the companionship of another being—a being who will regard one as perfect: whom one can treat as one's absolute property; who will be kind and faithful when times are hard and who will share one's joys and sorrows."

To his delight he saw a sympathetic light in her eyes. Then she nodded in agreement.

"So you're thinking of buying a dog?" she said. "I think it's a fine idea. Do let me help you choose one!"

Where Photographs Are Barred

Photographers have been barred from Yamen, in Southeast Arabia. The Imam has ruled that anyone having one of the sound producers will be dealt with severely. He also has issued another law imposing a tax on every man who shaves his beard.

Saskatchewan is the world's greatest wheat growing province.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of this woman's experiences. Advice from one who has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation, and was so very ill, I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my troubles are ended. I can eat and enjoy a good meal without any painful after-effects, my skin is clearer—in fact, quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen."—(Mrs.) M.R.L.

The immediate effect of the s's salts in Kruschen is to promote a natural flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little white pills" you will see that the relief which Kruschen brings is lasting relief.

Decorative Radiator Caps

Detroit Jury Advises Abolition Of Dangerous Car Adornments

Nude figures, Greek goddesses and long-necked birds whose distorted forms adorn the radiator caps of automobiles may soon disappear in Michigan if the recommendation of a coroner's jury is acted upon by the Legislature.

The jury returned a verdict of not guilty in the case of a driver whose radiator adornment pierced the chest of a 72-year-old man who suffered a punctured lung and died soon after the accident.

The recommendation was made by Coroner Albert A. Hughes when the verdict was announced. It asked that the Legislature pass an act prohibiting the use of radiator embellishments which extend beyond the front of the radiator.

Dr. Hughes said that a number of recent fatalities have resulted because of these decorative radiator caps.

Supplies For Northern Post

Steamer Delayed By Storms Reached Craig Harbor Safely

A sudden fall of the northeast gales that howl over the ice pack surrounding the north pole enabled the Hudson's Bay Company steamer "Nascom" to drop supplies at Craig Harbor, Canada's far-northern police post. Wireless messages received at Ottawa by the department of the interior said the high seas and ice now held the boats off the harbor only 800 miles from the pole for five days until the storms abated sufficiently on Sept. 7 to permit unloading.

The steamer, carrying supplies to Royal Canadian Mounted Police posts in the Arctic, was at the northern apex of its patrol at Craig Harbor.

Residents Should Know

Lady Outbridge Tells How Newfoundland Is Pronounced

On the Canadian National Steamships line "Lady Somers," coming up the St. Lawrence recently, newspapermen learned from good authority how to pronounce "Newfoundland." Granted that the people who live there have a right to determine pronunciation, and that Lady Outbridge, wife of Sir Joseph Outbridge, wife of 40 years residence in Newfoundland, is an authority, the way to pronounce it is "New-fun-land," with all the stress on the "fun-land."

For Hot Weather Use

London's commissioner of police is making tests of aluminum hats for policemen. A number of men on duty have been wearing helmets lined with aluminum foil, which is said to make headgear extremely cool. If the tests prove satisfactory aluminum hats will be ordered for hot-weather use.

While a couple in America were playing golf a cyclone destroyed their house. But, after all, what do golfers want with a house?

Up-Side-Down Flying

Italian Ace Describes Feeling In Three-Hour Trip

Sitting in a Chicago hotel, breakfasting on a muskmelon and coffee, Lieut. Tito Falconi told of his experiences in making a new world's record for up-side-down flight. His latest wrong-side-up flight was from St. Louis to Joliet, Ill., a trip that took three hours and seven minutes because of the slow speed rate that this type of flying requires.

"It's a swell feeling when you turn upright again," said Falconi. "It's like getting well after you've been sick."

Asked if a sensation of dizziness overtook him, the swarthy 1/112 Italian ace replied, "Ah, no. The only sensation is one of pain because of the constant weight on one's shoulders. In this method of flying the pilot is held in the ship by straps which fasten around the shoulder, and the sensation felt is the same one gets from carrying say, a 150-pound weight in a basket hanging from the shoulders."

The most thrilling experience in Falconi's career, he said, was had on this trip when his right safety strap gave way about an hour out. He was dropped half way out of the cockpit, his goggles were torn off by the terrific wind, and he was unable to see. An added peril was the fact that he did not wear a parachute, its weight being too great a handicap in the suspended position.

Egypt Buys British 'Planes

Said To Be Used In Fight Against Drug Traffic

A firm in Manchester has received an order from the Egyptian government for ten aeroplanes of the Avon 626 type. The type is a development of the "Tutor" type, an order for 300 of which was placed with the firm a year ago by the British air ministry, on the fulfillment of which the Newton Heath works are still engaged.

The type is one on which pilots can be trained in every branch of military flying, including blind flying and bombing.

It is reported that the machines are to be used in the Egyptian government fight against the drug traffic. The machines are admirably adapted for long-distances patrol work, and have machine-gun, wireless and photographic equipment, and each carries a pilot and a navigator.

Gas In The Stomach

Gas in the stomach, belching, sour water brash, pain after eating, etc., can be overcome within three minutes if you will take a little Biaurated Magnesia in water after you eat. The ordinary Biaurated Magnesia which you can get at any drug store will correct acid stomach and stop acid indigestion immediately. Try it and see.

Ready For Distribution

Saskatchewan Salt From Simpson Well Placed On Market

The first shipment of Saskatchewan salt, taken from the Simpson salt well is ready for distribution. More than seven years ago a company drilled for oil and about two years ago secured a salt brine deposit. The brine is being vaporized into salt by the Simpson Oil Company.

A well is being drilled about one and a quarter miles east of the salt well, where it is hoped to tap gas, to be used in the salt well for vaporization. With the profits from the salt the company will continue its search for oil in a field that geologists have said has good possibilities for the discovery of oil.

Tea Restriction

Protection Afforded Tea Grower Results In Higher Prices

In Andamania, a small island in the Andaman Islands was placed on tea exports from Ceylon, India, and Java, in order to raise prices to growers, who, for almost four years, had been suffering devastating losses. Higher prices have resulted, not only at the gardens, but also here on our own markets, and many package teas already cost more than they did six months ago. Some of the finer quality brands are as yet unchanged, however, and are, consequently, even better value than at last April.

Many Life-Guards

On the 4½-mile beach which limits the seaside resort to Portmouth 900 volunteer life-saving guards have just gone on duty. Southern is the first town to respond to a campaign for safety bathing, following scores of drownings this season.

Kentucky has a postoffice in the town of "Ice."

All's well with the pipe, all's well with the smoker when Ogden's Cut Plug is lit and drawing well.

Ogden's Cut Plug is a downright fine tobacco . . . cool, mellow and satisfying . . . made for the pipe, made to pack right, to light right and to smoke right. See what a difference it will make in your pipe!

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco and Chantreler cigarette papers

Foresees Highway From Argentine To Alaska

California Man Confident Road Will Be Built

Motorists of the future may be able to drive from Buenos Aires, capital of the Argentine Republic, to Fairbanks, Alaska, on the International Pacific Highway, according to Ernest McGaffey, manager of the magazine bureau of the Automobile Club of Southern California.

McGaffey is confident that the much talked-of British Columbia-Alaska Highway will be built, and that it will be a component part of the international road by means of which it is proposed to link North and South America.

Within the next five years, Mr. McGaffey said, part of this international highway would be completed between Nogales, on the border of Arizona, and Sonora, and Mexico City.

Taking Second Place

The time-honored onion has finally lost its grip on Bermuda. Agricultural statistics for 1933 show that for the first time the Bermuda onion is playing second fiddle to other vegetables in number of crates shipped from the island. Tomatoes leading by a score of 30,881 to 20,861. Carrots also passed onions this year with a grand score of 24,890 crates.

Marconi says he can eliminate static from radio. With some programs it wouldn't make much difference.

TAKE ENO'S FRUIT SALT

OCCASIONAL WIFE
By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS
Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some plan for the future.

(Now Go On With The Story):

CHAPTER IX.

Camilla lived in a new world, thereafter. Her face glowed with happiness and she walked buoyantly, as if the strength of Peter's arms had entered her body. The austere grandeur of the house that was still her home seemed to her more friendly and intimate, and it had been in the days before she learned that it was not her home and would refuse room to shelter her.

Seated alone on one side of the long table in the dining room, with Mrs. Hoyt, portly and jeweled and unequivocal at one end, and Mr. Hoyt, grim and silent and critically aloof at the other, Camilla managed a new cheerfulness that surprised her benefactors. Her joy was so abundant that it bubbled over and affected the lives of everyone around her.

She was even more gracious in her social obligations. She discovered new things to like about people whom she had grown almost to detest, and her world reflected her happiness as the evening sky reflects the roseate colors of the setting sun.

Mrs. Hoyt asked no questions, but she was confident that very soon Camilla would disclose her secret. She believed that she knew how to manage girls, having devoted much time to the psychology of adolescence, the reactions of youth to life and analytical character study. She believed that she had prepared herself adequately to handle any emergency in her duties toward Camilla. Beside, she had mothered Camilla for seventeen years.

As a matter of fact, she knew as little about Camilla as the daughter she never had borne. Her knowledge of children always had remained in the abstract, in spite of her experiences with this child. From the beginning, Camilla had managed her foster mother as successfully as Mrs. Hoyt had believed she had managed her foster daughter. With the intu-

tive shrewdness of the diplomat, Camilla had learned to submit apparently to her autocratic rule, to confound nervily all that was least important to her, and to live within herself with a secret exultation.

Camilla had been right when she told Peter hers was a dual personality. She had been divided against herself from the day she went to live in the Hoyt mansion. That part of her which was vivacious and rebellious had smoldered and ached, while she obeyed her mother's constant admonitions to speak softly, walk sedately and submit docilely. Fortunately, that barbaric element in her nature had not been smothered. Its chastened, cultivated urge, now awakened by the primitive urge of love, manifested itself in spontaneous laughter, generous impulsiveness and an eager impatience to fulfill her destiny.

Mrs. Hoyt immediately suspected a romance. She watched her with her friends, trying to discover which man had aroused her interest, the girl's attitude betrayed nothing. Her new graciousness was impartial. She arranged special occasions to talk with Camilla alone, making subtle hints that would lead to reluctant confidence. It was not her policy that anything should transpire under her roof in the lives and minds of the people there, of which she did not know every detail.

But even as Camilla deceived her righteously, she had suspected long ago that Alexander Hoyt employed the same defense against his indomitable wife. His thin, straight lips never smiled with pleasure, but Camilla often detected the reflection

turned the world upside down for her. Camilla had approached her, oh, so tactfully and warily, admitting the fact that it was a delicate situation which she was handling wisely with gloves. Which attitude was exactly what Camilla had resented most about the whole affair. Her docility had congealed Camilla so that there was no emotion left in her numbed consciousness; but when Alexander talked with her about this situation, his curt sympathy melted her so that she found herself feeling a kind of pity for him rather than for herself. She even could make some sense of the whole strange affair. It had been Mrs. Hoyt who had started it, impulsively, but it was this silent, unemotional man who reconciled the bewildered girl to the facts.

"You understand, Camilla, that this was not my idea in the beginning, but I want to share the responsibility," he told her quietly. "I should have preferred that you 'go down' knowing the truth, but—" He just looked at her, as much as to say that she would understand why his idea had not prevailed. "If we have done you a very great injustice, I'd like to try to make it right, somehow. You have three years in which to adjust yourself before you need to change your position here as our daughter. Will you let me know how I can help you, at any time?"

Camilla had promised that she would, and later, when she had proposed to enter National, at the evidence of Mrs. Hoyt's consternation, she had glimpsed one of his silent messages of approval, she was almost sure. He seldom displayed any interest in her work and so far as

Mrs. Hoyt Immediately Suspected A Romance.

of an inward twinkle in his keen, dark eyes. It even seemed to her that he derived amusement from the very thought that Amelia Hoyt was not getting away with as much as she believed she was. But whatever she believed did not trouble him. His capacity for authority was exhausted in his business and he was well content to give his wife the reins at home.

When Camilla had first lived with the Hoyts, everyone had been amazed that she did not fear his austerity, for he appeared to treat her no differently than anyone else, and everyone held him in awe. But the two martyrs of Amelia Hoyt's tyranny apparently had discovered a sympathetic bond that is common to all martyrs of the same cause, and without putting it into words or actions had lived by its sustaining power.

The nearest gesture toward paternal affection that Alexander Hoyt ever had displayed for Camilla was when he rarely took her awkwardly upon his knee, as a child, and permitted her to examine his watch; or when he shyly smuggled a gift for her under the Christmas tree. He never had praised or humored her, but as she grew older, Camilla was sure that she sometimes detected a flicker of withheld approbation in his eyes.

At other times, when she was reprimanded or commanded by Mrs. Hoyt, she suspected that he was laughing with her at her quiescent submission. Did he, too, only appear to submit to Amelia to save argument and energy, because opposing her was as useless as hurling one-self against a stone wall?

Years later, he had been the kinder of the two when they had explained to her their plans for her as their temporary ward. Almost, her resentment had caused her to commit some rash act when the woman whom she had accepted as her mother had

she knew, did not take her ambition seriously. But he never opposed her. The situation between her own parents was quite the opposite, she learned when she began to visit in their home. During the fourteen years while she had lost her identity with the Lorenz family, she had gone there occasionally with Mrs. Hoyt, and very rarely her own mother had visited her at the Hoyts.

But she had known them only as a family in which Mrs. Hoyt was curiously interested. She had played with Rose and Frank and Anna and the others at various times, and liked them well enough, unaware that they were brothers and sisters.

Her own father—bored and bullied at the foundry by foremen and forewomen, became the autocrat at home the moment he entered the door. His wife meekly accepted his rule to the letter, impressed the children with his authority and commanded their obedience with the dire threat of, "You'll see what happens when I tell your Pa on you, tonight!" It was usually effective.

Camilla could remember as a child how she had feared to visit at the Lorenz home when he was there. Several times, he had taken her on his knee and chuckled her under the chin and laughed raucously at her frightened expression. At first, she had been kept away from them long enough for her to forget her family, but vague memories had stirred in her childish mind and troubled her, every time she saw any of them through the years.

After the revelation of the whole situation, she had gradually fitted together that series of memories and incidents, like a difficult picture puzzle. She loved her own mother with a mingled pity and resentment, but she never was able to think of "Pa" Lorenz as her father. From her modern and sophisticated background of culture, she studied and analyzed him, recognizing an occasional char-

"The prettiest rag rugs I ever saw"

"I feel I should share with you a wonderful compliment I had on my new rag rugs," writes an appreciative Three Rivers woman. "A wealthy lady from the City of Quebec was visiting here and saw the rag rugs I had just finished. She was so enthusiastic—said she had never seen such artistic ones, with such rich, lovely colors. She asked me if I bought new materials to get such beautiful color effects. When I told her I had dyed my old scraps with Diamond Dyes, she simply couldn't believe it. Of course I'm very proud of my rugs. Besides being beautiful, they are fast and washable." In the popular new art of rag making women are finding again the real value of Diamond Dyes for permanent dark colors by boiling. No other dyes make materials look so new and rich in color, because no other dyes contain so much of the finest aniline colors. For light dainty shades without boiling for lingerie, summer blouses and dresses, use the wonderful new Diamond Tints. All dyed articles have both Diamond Dyes and Diamond Tints.

acteristic of her own; but hers had been so refined and cultivated that little resemblance was left.

Henry Lorenz was the kind of naturalized American citizen who liked to call attention to a yard of parked automobiles at the factory and boast with a slight accent, "See them cars—hundreds of 'em? Who owns 'em? We all do. Yes, sir! Even laborers in this country ride to work in their own automobiles. You don't see nothin' like that in the old country. Why, a man does well to have black bread and sour milk over there. We have the best of everything here: food and clothes and homes, and our own automobiles—everything. Yes, sir!"

His boast was not so much a testimony of patriotism as it was an indirect praise of his own wisdom in adopting his new country for his own. Camilla had reconstructed that ambition in her imagination.

Build New Bridge

Two Million Dollar Structure For Ladner, B.C.

Construction of the proposed \$2,000,000 bridge across the Fraser River at Ladner, below Westminster, will go ahead shortly under plans of the Ladner Bridge Company, according to information received from the British Engineering company retained to build the bridge. Engineers will leave England for Vancouver within the next few weeks, it is stated.

It is understood financial arrangements for the bridge project have been completed in England.

British Columbia government already has passed an order-in-council embodying an agreement with the bridge company. The city of New Westminster has protested the present project and asked for a royal commission inquiry, but this has been denied.

THE RHYMING OPTIMIST
By Aline Michaelis

AGE SHOWS THE PATTERNS

Age takes away such vivid things: This sense of wonder and awe of wings. This glad response to morn's gay call. This poignant ache when shadows fall.

This stab of rapture or despair, Age takes, and leaves its calmness there.

Such lessened life scarce seems to live: But age has other boons to give: The gift of quiet, where unrest So long has ruled the troubled breast; From many yearnings a release, And after care and conflict peace.

Age shows men patterns which they made In those young years when, unafraid Of any challenge, any threat, They knew no menace, no regret.

Age points the meaning of the maze They wandered through in carefree days.

HELP FOR TIRED WIVES
Take Lydia E. Pinkham's Vegetable Compound

Wires get tired during these hard times. They are the ones who must bear the brunt of the strain. Their husbands come home with less money in their pockets. It is the wife who must struggle alone and make the best of things.

If you are tired... worn out... nervous, try Lydia E. Pinkham's Vegetable Compound. It is a tonic that will give you the strength to carry

96 out of every 100 women who report relief from their troubles by using this medicine. Buy a bottle from your druggist today... and watch the results.

An Extraordinary Tunnel

Built in England To Test Air Currents For Planes

At the Royal Aircraft establishment at Farnborough, an extraordinary tunnel is nearing completion. It is 24 feet in diameter and it is so arranged that currents of air at speeds up to 200 miles an hour can be blown through it. Its purpose is to enable experiments to be made on aeroplanes. The tunnel is nearly 500 feet in length, but it is made on a curve and housed in a building 230 feet long, 140 feet wide, and 90 feet in height. The wind is produced by fans driven by motors of 2,000 horse-power. In designing aeroplanes it is of the utmost importance to know the air resistance of a particular shape of wings, or body or engine cowling. Hilbert experiments have been made either in actual flight or with miniature wind tunnels. To make them in flight was a risky business, and all dangers will be eliminated by the tunnel. The speed of an aeroplane can be enormously reduced by parts whose shapes are not exactly correct. It has been found that a round strut has an air resistance a hundred times as great as one of a streamline shape.

Little Helps For This Week

"O fear the Lord ye His Saints; for there is no want to those who fear Him."—Psalm 34:9.

"Thou openest Thine hand and satisfyest the desire of every living thing."—Psalm 145:16.

What Thou shalt today provide, Let me as a child receive: What tomorrow may betide, Calmly to Thy wisdom leave. 'Tis enough that Thou wilt care; Why should I the burden bear? —J. Newton.

Have we found that anxiety about possible consequences increased the clearness of our judgment, made us wiser and braver in meeting the present, and arming ourselves for the future? If we had prayed for this day's bread and left the next to itself, if we had not huddled our days together, not allowing to each its own task but ever deferring that to the future, and drawing on the future for its own troubles which must be met when they come whether we have anticipated them or not, we should have found a simplicity and honesty in our lives, a capacity for work, an enjoyment in it, to which we are now for the most part strangers.—F. D. Maurice.

League Of Nations In Canada

Radical Re-Organization Of The Society's Work In Dominion

A scheme for radical re-organization of the society's work in Canada in future was adopted at the 11th annual meeting of the League of Nations Society in Canada.

Under the plan, a national council of 30 will be formed from all parts of Canada and will be formed. The new president is likely to be some outstanding Canadian and it is intimated may not be a resident of Ottawa.

The new national council is empowered to consider the appointment of a qualified person as chief executive officer of the society to be known as national secretary. This officer also will edit the official quarterly publication, "Interdependence," and have charge of the society's publicity work. A central executive of the council, composed of 10 members, meeting at Ottawa as the continued headquarters of the society, also will be set up. The nominating committee's report is to be given later.

Had Woony For Nothing

Orlin Johnson, chief mechanic for Gar Wood, holder of the Harmsworth speed boat race trophy for the United States, was not feeling quite so happy. He was rather worried. For the first time since he has been riding in Wood boats, he has been unable to find a four-leaf clover. In every previous race, he has picked up one of the lucky little plants inside his jacket.

Must Own Gas Masks

Disturbed at the political situation in western Europe, the Turkish Government has decreed that all Turks must provide themselves with gas masks at their own expense and that in every village and bombproof shelters must be built. The government, it was added, would build factories to make gas masks.

An electrically-driven miniature motor car intended for children's use in gardens and private grounds is being marketed in England. The pseudo-auto has all the fittings—gears, self-starter, horn, lamps, accelerator, etc.—of a real auto.

Germany has placed a higher tax on strong beer than on light beer.

Madame Lacoste's delicious CHOCOLATE LAYER CAKE

1 cup butter
1 cup sugar
2 eggs
1 teaspoon vanilla extract
1 cup milk
2 1/2 cups pastry flour (or 2 cups and 2 1/2 tablespoons of bread flour)
3 teaspoons Magic Baking Powder
1/4 teaspoon salt

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and flavoring; add flour, sifted with salt and baking powder, alternately with milk. Fold in stiffly beaten egg whites. Bake in 3 greased layer cake pans in moderate oven at 375° F. about 20 minutes. Recipe for Chocolate Icing and Filling is in the Magic Cook Book.

Why Magic Baking Powder is used exclusively at this Montreal School of Domestic Science

"We teach our students only the surest methods," says Madame R. Lacoste, Assistant Director of the Provincial School of Domestic Science, Montreal. "That's why I always use and recommend Magic Baking Powder. Its high leavening quality is always uniform. You get the same satisfactory results every time you use it."

And Magic Baking Powder is the unquestioned choice in the majority of cooking schools throughout the Dominion. Cookery teachers—and housewives, too—prefer Magic because of its consistently better results.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked goods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

Cash Campaign in Dublin

Merchants Do Not Cash Cheques Or Give Credit

"Pay Cash" is the slogan of a campaign recently started in the Irish Free State which is reported to be bringing money out of hoarding. In Dublin merchants are intensifying the drive by posting such signs as "We do not cash cheques—not even good ones," and "We will give you credit—even for good intentions."

Relics of agricultural life in Tudor England, are being collected for exhibition purposes at the home of Mary Arden, the mother of Shakespeare.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS
Wake up your Liver Bile

—No Calomel needed

When you feel bilious, sour on the tongue, or have a bad taste in the mouth, it is two pounds of bile into your bowels. Digestion and elimination are being slowed up. Food lies around idle and decaying inside you and making you feel wretched. More liver-cleansing like milk, salt, oil, mineral water, laxative candy or chewing gum, or roughage, don't go far enough. You need a liver stimulant, Carter's Little Liver Pills. Let them give you your appetite, bile, and energy back. Buy a bottle today. Refuse substitution. 25c. at all druggists.

Job Printing

in all its branches promptly and neatly executed and at prices that will compete with outside firms.

Chinook Advance

Where The High Country Calls

An adventure has found a splendid and thrilling outlet in the new order of the outdoors, the Sky Line Hikers of the Canadian Rockies. Organized at Banff and Lake Louise this season, the new order provided such happy, healthful opportunities for hiking over the high passes, Alpine Meadows, and mountain trails of the National Parks of Canada, that devotees of the outdoors throughout Canada and the United States are now singing its praises. The inaugural hike this year took a large party of enthusiasts, under the expert direction of Swiss Guides Ernest Furrer and Rudolf Aemmer, through Paradise Valley over the high trail past Lake Annette, and over Sentinel Pass to Moraine Lake. The second day's journey took the hikers across the magnificent Wenckemba Glacier, and through the flower-decked Wenckemba Meadows, and finally over the snow-bound pass of that name to Eagle's Eyrie on Tokom Creek. The third day saw the conquest of Opabin Pass,

some tricky work on the glaciers and finally the Lake O'Hara Hungry Camp. Hikes in the O'Hara country and the Pow Wow occupied the fourth day, and the eighth mile hike to Wapta ended this truly historic expedition. Norman B. Sisson of Banff, is the President of the new order, which is now in full swing with steadily increasing membership. A four-day hike in the Toho Valley will be one of the major activities next summer.

The picture lay-out well illustrates the happy moments on the trail. Carl Rungtius, internationally famous artist, is seen extolling the virtues of the Alpenstock to Miss Georgia Engelhard, celebrated mountain climber and New York socialite. A group of the hikers triumphant on Sentinel Pass enjoying the splendid view down in the mountain valleys below. The first annual Pow-Wow and the Sun-dance Lodge.
